	New development should be planned in areas where it is needed to encourage residents to live and work in the county. Planning in advance avoids later arguments as to the intended use of a given land area.	Any factory, industrial or argicultural should be confined to areas that minimize impact on current and future residents. People are the county's most precious resource and quality of life should trump indsutrial economic interests. No one wants to live and raise a family near a factory. Ever	This would make most sense; however, should the state decide to turn 30 into a major thoroughfare, continued development would increase the level of danger currently posed by high speed service's sharing the roads with people communiting to school and work. Some separation between those uses is paramount to avoid the loss of life.	Factory farming is inherently opposed to the quiet, peaceful and healthy presence of families. If your goal is to grow population, encourage young people to move here, and maintain the family nature of the county, and family can't control policy. Make a plan that benefits <u>everyone</u> not just one family. Confine pollution away from people. That is NOT farming. It's a factory.	Again, if your actual goal is to encourage individuals and families to live and work in the county and raise families, then need clean, safe, healthy places to live without fear of illness or environmental contamination or fear of one person controlling the entire future of the county.	
15				A single landowner's desires should not outweigh the surrounding landowners objections, especially when the surrounding landowners have owned their land longer. Petitions from opposition groups should be considered during any decision making process.		
16				Due to possible ODOR problems		
<u>17</u> 18	Farms should be preserved - small lot splits, mini subdivisions, mini farms increase the conflict between residences/farms		We need to be sure we have space for commercial/industrial growth and expansion	Ordinances are already in place and have recently been updated. Ag zoning should be respected and promoted.	Only in appopriate areas close to utilities and cities/towns. Splitting of farms into small parcels should be discouraged.	
19	I feel strongly that residential growth should be focused near areas of best services, as well as to avoid rural/urban conflict and parceling out our valuable farmland and rural aesthetics	More so urban design and experienced, thorough planning	Would like to see Agribusiness Park focus between Larwill and Pieneton (Kosciusko Co.)	The state (IDEM) regulates these operations and contrary to hostile and hysterical residents in certain areas who believe misinformation - there is no reason for "clearer direction." 	Avoid spot development.	There needs to be more sensitivity to landowners who are impacted by new industry, large developments or CAFOs.	Industrial corridors along highways degrade surrounding land uses. More consideration of landscaping and helping make areas attractive.	You got that right!! Currently zoning is unclear, politically influenced and impact on nearby residences disregarded. No environmentally regs. with teeth. Our lakes and lake life is at risk.	This should be a given but why e over development? Protect the character of the county and resp sustainable ag.
32			Also look at the other such as south whitley and Churubusco.	The county rules and regs are already stronger than the state. Also, Indiana's Right to Farm has been established by the US Supreme Court	
33				Zoning is as clear as it needs to be - why are CFOs being singled out?	
	Development should be encouraged [illegible] areas of the county. AG resists residential development too much.	Intensive farming CFOs should be separated more from lakes and residential areas.	Whitley Co. needs that continued industrial growth.		We need to [illegible] more long residents to Whitley County.
	Keep farmground and estate properties intact.		Increase in resident employment rates.		
36					
37	There are areas of the county that are more desireable for growth. Jefferson TWP near Allen County north and south along SR9. There south naturally be residential growth near the new H.S.	Good residential planning should include strong setbacks, buffer areas, and transitional zoning. CFOs should be encouraged through zoning in areas that most CFOs already exist.	Large industrial business should locate along SR30 where infrastructure already exists.	The county should designate areas of the county where CFOs should be built near existing CFOs SW near south Whitley. AFOs should also have restrictions in residential areas.	With proper planning, Whitley C located well between Fort Wayr Warsaw for great residential gro been detailed that job growth w when there is reisdential growth

	Utility improvements should also be considered where potential exists.	industrial and intensive agricultural	Industrial growth needs to be complimented by residential and infrastructure investment. The growth has been coming slowly but with insufficient supporting structures and services.		Residential properties are often seen by the county as negative and in opposition to agriculture. It is possible and necessary to allow growth in residential building without damaging family farms.	Infrastructure is too often a significantly overlooked aspect of growth. Water, sewers, well-maintained roads and high- speed internet are all crucial to growth yet the funds available to procure and maintain these resources are insufficient. The plan for the future must include applying for and making use of every grant and matching dollar available in combination with public (tax) and private funding. The county and cities must develop and work the plans together. All constituents (industrial, residential and agricultural) must have equal representation to ensure success.
70						
71				to and while those can be smelly on their own, CFO's are a level that brings pollution, smell, and decreasing land values. If you want to drive population growth and not just growth but growth from higher paying jobs, people with skills,	More homes but neighborhoods with connectedness. Fort Wayne and Allen Co have done an excellent job of connecting trails, etc. so that residents can go wherever they want by foot or bike and that's gaining more and more traction regionally. It fosters healthier lifestyles as well. It improves your residents quality of life, connectivity, and options. It's all very attractive.	
	There are so many areas that have been left empty. I feel that, when possible, those areas should be marketed and utilized prior to building new structures.		US 30 provides the best visibility for new development. Also, the ease of access is a positive.			

Unique ID		1B	1C	1D	1E
73					
74	The southern part of the county (9&14 area) should also be an area of new development.	Don't just string a bunch of developments together like Fort Wayne. Keep them at a high standard for value and aesthetics. Implement large commons areas , ponds, and walking/bike trails throughout.	-		This cannot be a Lancia/Granite over! However, there should be one or two more subdivisions as Eagle Glen which include recrea areas for families.
75					
76			Inventory of underutilized Industrial spaces should occur and promote more compact industrial development (e.g. share parking pools, etc.) should be considered. Also a delineation between types of industrial uses that are to be encouraged/attracted would give clear guidance. If US 30 is to be used as an industrial corridor consideration should be given to rail infrastructure to lessen the truck activities that may impact the highway/traffic.	This needs to be in concert with residential zoning requirements and clear mitigation/separation guidelines. This is especially necessary for areas targeted in the county for residential growth to minimize the opposition to CAFOs and ensure the entire community understands the implications of these setbacks and mitigation requirements.	A mix of housing always provide opportunity for housing choice, options and need. Single zone u be minimized and clear urban d direction for housing mixes shou included in the comp plan direct
77	Too much rural area is being lost to developers which is destroying good farming and grazing land. Urban sprawl creating traffic problems.	Stop letting cities like Fort Wayne from pushing into Whitley County thereby bringing their higher taxes and crime with them.	Destruction of the rural areas along US30 will just bring traffic and higher taxes, Do we want what has happened in northwest Indiana near Chicago happen here?	Too large CFOs cause odor and landscape destruction.	Strict limits should be put on mo housing additions.

105	This depends on the situation		I've been to a meeting on this. We all like to eat. We already have rules established why keep revisiting this. The waco left will keep beating this until there is no farm anywhere!	If there is a need developers will build. I don't like Allen County coming into Whitley County. They try to jam as many houses in an ares as possible. It should be kept close to existing towns. I do think Larwill, South Whitley, Col. City and Busco would benefit. One of the developers from Allen County stated when he looks across the county line they see a gold mine. In my opinion he is only interested in padding his wallet.	
106					
107	a minimum of one mile, between new intensive land uses, such as CFO's, and existing property owners. People who spend years, sometimes decades,	kept close to the main highway through town to keep large truck traffic on rural roads to a minimum. Large trucks and	Why not just throw darts at a map to choose a location for a CFO because there currently seems to be no direction regarding their location? The only people that I hear say that CFO's are "not that bad" are the people that build the CFO's. If they are "not that bad", then why, when manure is being pumped or applied to fields, is it not done on days when the wind is blowing in the direction of their homes. Just curious if CFO permits have ever been denied, and if so, for what reasons?	If people want to buy land and build a home, they should not be discouraged. But unrestricted growth should be discouraged. Subdivisions could be limited in size or require larger lots. Plenty of green-space should be incorporated into subdivisions if lots sizes are smaller. I would not like to see Whitley County as just an extension of all of the subdivisions in western FW. Savannah, GA is a great example of a city with green-spaces. They are giant grids with green-spaces every few blocks.

But local leadership, wants something else, more people to tax, for	natural habit for the wildlife.	US 30 ready has more traffic then it was designed for. Additional growth is not going to help the situation. Doesn't need more stop lights or traffic.	You want more people and sprawl, less land almost dictates we need the confined operations to feed all these people. We have lost the farm land and someone needs to feed the people.	Stop the Sprawl, Need the farms an need the woods for the wildlife.

	Comments
	The County should partner with the Towns and the City to develop areas for growth.
	 All tax paying residents should be afforded the same return their investment. Education, fire and police protection, roads and road maintenance, Internet and utilities. They should not be subject to a devalue of their investment because of the lack of these. In the debate between the rights of the property owner and the community, neither should have their wants meant without the consideration of the other.

132 Southeastern Jefferson Township is a	Southeastern Jefferson Township is a jewel and should prohibit any intensive residential and intensive industrial uses	Business along a big business route is great but allowing it along 14 was a mistake. Lack of zoning allowed manufacturing in an agricultural/residential area. We need to be wary of allowing that in other areas and expanding on past mistakes.	ABSOLUTELY. A lack of leadership in prohibiting CAFOs from Jefferson Township has caused tremendous consternation, has divided the community. Following the spirit of the existing Comprehensive Plan with further restriction to prohibit CFOs and their negative impact in this area is essential, while the Right to Farm should not be used as the right to harm others and discourage reasonable well planned growth.	
133 I think this makes sense and can build up existing areas of development while keeping residential and rural areas as they are. But I'm not opposed to developing in an undeveloped area if it makes sense financially, the residents support and the infrastructure is there.		Not sure if this is a trick question. I'd love to see more development in and around Park 30. Maybe even more aggressively than what's been done in the past 25 years? I think Park 30 is a big benefit to CC. That said, we need to continue pushing the state to make US30 into a freeway to accommodate increased development along the corridor.	I don't have a strong opinion or much knowledge on CFOs.	
	be a better plan.	All development along US 30 needs to fit the proposed future intersection and road improvements being develop by INDOT.	Confined feeding should be discouraged.	Not sure what you mean by "Cour would be better to build more hor near the Towns and Cities. Rural h use up valuable farm land and cau sewage problems.
infrastructure and then focus the growth in this areas. Before any new areas of growth must have sewer and other utilities available. This would help decrease water contamination and	Established farms and farm use including Confined feeding operations should be allowed if the owner is compliant with current land zoning and IDEM approval. Others should not be able to restrict land owners from using their property as they wish, if within the current zoning. Also current farms must be allowed to grow to allow for future growth of the farm business.	It makes sense to continue growth in this area.	The animal units for Whitley County should mimic IDEM animal units to make it less confusing for all. This would help with compliance and reporting concerns if there are concerns.	- ·

	Comments
	My primary focus is Jefferson Township, specifically Southeastern portion. I would like to see its rural nature continued by both farming and rural residential. Traditional agriculture, meaning crop farming and small family farms with some livestock, is acceptable but confined feeding operations with great numbers of animals confined is not. Also, Agritourism is an important tool that State Tourism is promoting that helps grow the economy and helps those interested in learning more to experience a rural culture. The definitions of agritourism are evolving but it is becoming an important part of the county dynamics.

Highway 30 is very congested at rush hour and clogs up the heart of the city. 205 and 30 has ALWAYS been a very dangerous intersection and continues to be. I am sure that the area by Coesse and 30 is a disaster as well.	The infrastructure of the ENTIRE county is important.	Do not make the trail in a secluded area. This could pose a danger to riders/walkers. People are sick these days.		There should DEFINITELY be a traffic light on State Road 9 by the high school. There was a lot of traffic here already before you added hundreds of immature/inexperience drivers to the mix. PRIORITY #1
dealing with increased traffic should maybe perhaps look at thresholds for opportunities to mitigate potential traffic issues (e.g. is there a commuter transit service that would get people to/from work and home? or are there other routes that might help mitigate traffic?"). The knee jerk desire would be to add a third lane, limit access to US 30 however studies show that adding lanes only induces more traffic and so the first line of defense should look at mitigation opportunities rather than expensive expansion options.	transportation corridors in the county and then rural roads that will receive periodic upgrades.	for mobility options should be established to look at what near-, mid- and long-term alternative mobility options can be integrated throughout the county. Rails- to-trails, inter-town bike paths, winter trails, etc. could provide connectivity that does not rely on cars, and can promote active options for residents.	HSR might not be on the cards, but there are commuter rail options that are viable - but will require a look at the Return on investment (e.g. compact housing around station areas, walkable districts that encourage transit use, etc.) - Thresholds should be created that would trigger looks into this - understanding minimum density needs, concentration of development that would support transit service and also where lines should go (work destinations and origins, travel patterns, etc.)	
	Many of our roads are in poor shape. Lets fix them	Near cities and towns especially.	Waste of taxpayer money.	Do not overbuild housing and industry.

YES! We need more police (State & local) on US30. There have been way too many vehicular DEATHS between truckers & drivers. Truckers are a hazard on US30. They should be using I-80/90 not surface roads at high-speeds. A regular vehicle is NO MATCH for a big rig who is speedingalmost like car versus train, train always WINS.	Rural equates to RESIDENTIAL. We need asphalt not chips! Maintenance of local roads is a GIVEN. If the County takes regular care of the roads less money will be spent in the long run.	and walking paths would be great.	Light rail would be an amazing opportunity to increase mobility within the areas, including Ft Wayne.	I just want to know HOW all these improvements are going to be paid for?
	Maintain all the county roads, not just the ones around the lakes and subidivisons.

If wetland protection policies are to be pursued, to me that would mean that natural wetland areas should be
preserved, and not allowed to be drained and "recreated' in another location.
I'm 100% in favor of protecting plant and animal habitat, but when wetlands are mixed with development, it can be a danger to both parties.

Depends on the restrictions. I have seen restricted areas in danger and populated lake fronts where the wetlands thrive.	3C Education is key to this helping land owners know what can be done on their property and how to do it. Even helping with the expense. How big a problem is water erosion here? I think wind would be a larger concern. Need more info.	Good policies and assistance can really help here.	My research on solar farms are their	General Comments The green new deal is not really green or a deal. For solar or wind.
		The county should continue the current policy.		
I agree that these are important areas to protect and be careful with. I feel these areas should not just be lumped into a "one size fits all" category as many of these areas should be considered individually because some of these designated areas may be okay for careful development.	Agree. Again, some of these rules don't conform to every situation and should be reviewed by an expert and not just lump everything into a generic set of rules as these may be legitimate exceptions.	Septics are becoming more and more on the radar screen. Older high density rural residential developments have been found to have failing septics as well as the old farmhouses that have not been updated and often times don't have a septic field.	Renewable energy will become more and more important as the awareness grows about climate change being real and the population continues to grow and solar efficiency continues to improve.	
People like to live on a lake. How can you stop that?	Those are okay but should not be mandated.	I perceive that they are already regulated.	Solar is okay but it can't meet all of our power needs.	

Comments	4A

		I don't know enough about this subject, but you should not proceed with any plans on this until you have FULL input from residents and farmers and not just "experts" that do not have the resident's best interests in mind.	administer anyway. Think California	Clean air/water/resources are important. However, this does not mean radical environmental regulations that do not work should be put in place. Conservative, rational solutions should be engaged and implemented. Also, the chemicals that are used in our water or to spray the atmosphere or the crops should be banned immediately! We are human beings, not guinea pigs.
yes - BUT there should be clear guidance to mitigation and site placement that would mitigate flooding of buildings.		Yes - this is important for new development.	Like all alternative energy development - care should be given to placement of and screening/mitigation measures if these are close to residential areas.	
Too much overcrowding destroys.		Do not make it Cost prohibitive and burdensome to landowners!	Solar power is not cost effective to lower electric rates. Wind towers are unsightly and destroy the landscape.	Keep windmill towers out of Whitley County or we look like US 30 going into Van Wert county Ohio.
	<u> </u>	1	l	

	4A
tes are important. mean radical ons that do not lace. olutions should be ted. Also, the in our water or to or the crops should ! We are human	This is a strange statementi.e. we shouldn't only add more jobs for doctors in the county and ignore the skill sets of existing residents. However, don't dumb people down, either! There's more to life than factory jobs. If there is an opportunity to bring a business to the county that requires a different skill set or trainingthen provide the opportunity for the training or schooling that is required to fill the jobs for our community members so that people from surrounding counties don't get the jobs before our residents do.
ut of Whitley	Job creation should be a priority.

Overly used at taxpayer expense. Too often the business does not meet expectations and promised jobs.	Take an out-of-the-box perspective.	Growth alone should not be the objective. Focus on quality of living not just economic development.	Yes, as part of a broader effort to support families.		
It is the only way to enhance and attract new business.	Young people are fleeing W.C. because of a lack of jobs and housing.	Absolutely. We've built a new H.S. we need to sustain.	No, county cannot be everything to everybody. Not our business. Why is county in our biz?		Parks help identify a community. More parks = more families = more recreation.
More businesses mean more jobs, more residents, and more taxpayers for the county. The growth of agricultural assets does little for the county.	A focus on our natural resources like lakes, trees, parks and trails along with a great broadband system will attract young people.	Residential growth will lend to more jobs and residents who will live in the county.		The county is poised for tremendous growth if it becomes forward looking. Residential growth is the key to a bright future for Whitley County.	A strong private/public partnership is needed to achieve this goal of long-term funding.

The municipalities are doing a good job on this. It is important to keep parks in town where kids can walk and use them.
What we have is sufficient. Perhaps the County gives some support to municipal parks. In a rural county, you don't need a park? Your backyard <u>is</u> your park.

Does the County have parks? Not necessary, if you want to use a park, go to the town. If funding for the city parks are necessary because of people from the rural areas coming in, then the county could provide some help.

We already have Morches Park which
could be improved or have amenities
added. What about the land where the
old high school sits? That would be
adjacent to the new swimming pool. I
believe there is a park or maybe two in
South Whitley, and I believe there's a park
in Churubusco. What is the situation with
these parks? Are they in good shape?
Are they used? Are there suggestions for
additions/improvements?

A list of county parks and attractions should be readily available (see Kosciusko

County)

				Three major initiatives need to be	
				addressed in Whitley County. One,	
				highway effectiveness, reduce the	
				bottlenecks created by US30 and SR9	
				running through the City. Two, install fiber	
				optic access to all areas for digital service	
				and, three, community planners know	
				there are four things which enhance	
				growth in a communit: a sports stadium, a	
				college or university, fibrant business	
				diversity, and a major arts complex such as	
				Honeywell Center in Wabash. The County	
				has none of these. True improvement is	
				going to require sacrifice maybe of old	
				traditions and treasured land and all of it	
				requires MONEY.
